70% of the legal advisory services we provide have an international dimension, whether we are assisting foreign clients doing business in Israel or Israeli clients doing business overseas.

Barnea is a leading commercial law firm in Israel. We have earned an esteemed reputation for our extensive legal expertise in international activities.

Our international capabilities, which include commercial knowledge, innovative thinking, and a broad network of connections with law firms abroad, enable us to provide comprehensive legal solutions. Whether servicing high-tech companies, infrastructure corporations, financial institutions, VCs, low-tech companies, or private investors, our solutions are tailored to match each of our customer's business strategies.

In addition to our in-depth understanding of the legal needs of each client, we also offer considerable experience and a keen understanding of what is required to assist our clients in every business decision. Whether expanding into a new market, conducting mergers and acquisitions, or settling legal disputes, we provide a personalized legal team that works with each client to overcome even the most complex of challenges.

As a result of our experience handling cross-border business activities, we are adept at bridging between different legal systems, local regulations, language differences, and cultural gaps, as well as at resolving disagreements and disputes between parties.

We do not merely provide answers to legal questions. Rather, we strive to understand the broader context of each business issue referred to us, and we propose practical business and legal solutions only after listening to all those involved in driving the transaction. By familiarizing ourselves with the particular business environment, we are able to carefully analyze all the various considerations that need to be taken into account, and thus offer the best results.

This combination of professionalism, work ethic, wealth of knowledge, and extensive experience enables us to provide comprehensive services that are customized to the needs of each client, regardless of the scope, volume, and complexity of the transaction or legal matter.
